Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 30-32, 35, 39, 40, 46, and 51 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Buhne USP 6,802,414 (see Figure 3 of Buhne).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marsiglio et al. USP 4,421,228 in view of Schwenk USP 2,788,883.

See the previously attached marked up cover sheet and drawing sheet 2 of 2 depicting many of the claimed features of Marsiglio.

Marsiglio discloses a belt instead of a pair of chains and all of the other features except for a pressure responsive cylinder for tensioning the chains. Schwenk teaches a pneumatic/hydraulic cylinder arrangement (10, 82). It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize a pressure cylinder as taught by Schwenk in the device of Marsiglio (for his spring tension member). The examiner takes Official Notice of the equivalence of belts and chains for their use in the conveying arts and the selection of any of these known equivalents would be well within the level of ordinary skill in the art. The same argument can be held for the type of tension adjusting mechanisms as well. The selection of a pneumatic, hydraulic, spring, rack and pinion falls within the level of ordinary skill in the art as functional equivalents as well.

6. Claims 41-45, 47, 48, and 53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buhne USP 6,802,414 as above.

The examiner takes Official Notice of the equivalence hydraulic, pneumatic or any type of cylinder perform the same function and their use in the conveying arts and the selection of any of these known equivalents would be well within the level of ordinary skill in the art.

Response to Arguments

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Allowable Subject Matter

8. Claims 16, 33, 34, 49, 50, 52, 54 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
